

Maxicarb WH[®]

Product Description

Maxicarb[®] is a blend of high quality bentonite and carbonaceous additives selected to suit individual foundries requirements.

Features

- High volatiles and lustrous carbon generation
- Thermally stable bentonite
- Efficient mould reducing atmosphere
- Environmentally friendly

Benefits

- Optimized surface finish
- Improved bond development
- Optimized peel off
- Low fume generation

Typical Analysis

Bentonite Maxibond 7 content	60 %
Volatiles	20 %
Lustrous Carbon	4 %
Loss on ignition	42 %
Moisture	9 %

Packaging

Bulk Tanker

Bulk Density 770 -800 kg/cm³
