

Maxicarb 1F[®]

Product Description

Maxicarb[®] is a blend of high quality bentonite and carbonaceous additives selected to suit individual foundries requirements.

Features

- High volatile and lustrous carbon generation
- Thermally stable bentonite
- Efficient mould reducing atmosphere
- Environmentally friendly

Benefits

- Optimized surface finish
- Improved bond development
- Low fume generation

Typical Analysis

Bentonite	70%
Volatiles	12%
Lustrous Carbon	2%
Loss on ignition	30%
Moisture	5%

Packaging

Bulk Tanker

Bulk Density 770 -800 kg/cm³
